WORK EXPERIENCE

Software Developer

BusyWizzy Technology Solutions Pvt. Ltd.

Aug 2024 – Present

Full-Stack Development

- Architected and delivered a **full-stack corporate website and headless CMS** using **React and Laravel**, spanning **10+ content modules and 15+ SPA routes** with scalable frontend systems built on React hooks, code splitting, and performance-optimized UI components.
- Designed and implemented **30+ REST APIs** with **JWT-based authentication**, **reducing frontend integration time by 40%** and enabling secure, modular communication across services.
- Built a comprehensive **admin panel with CRUD operations**, dynamic JSON-based configuration, and media/file management, backed by an optimized **MySQL schema (20+ migrations)** and **Excel import pipelines** with validation workflows.
- Engineered robust backend systems including **RBAC, audit logging, async queue processing**, and complex business logic (**tax workflows, PDF/XML generation**) following **clean architecture** with Admin and API separation.
- Integrated third-party services (**Google Maps API with fallback logic, WhatsApp API**) and implemented **SEO optimization via React Helmet**, scroll-spy navigation, and dynamic rendering to improve UX and search discoverability.
- Developed **10–15 custom modules and themes** on enterprise **Drupal** CMS platforms for global client deployments, including **payment gateway integration** for secure transaction flows and end-to-end order processing.
- Authored **PHPUnit test suites** (unit, kernel, and functional) to improve code reliability and catch regressions early in the release cycle.
- Set up and maintained **Jenkins + Docker CI/CD pipelines**, automating builds, tests, and deployments across development, staging, and production environments.

Prompt Engineer

SoftAge Information Technology Ltd.

Mar 2024 – Jul 2024

AI / NLP

- Engineered and optimized **prompts for AI systems** to improve **response accuracy and relevance** across production workflows.
- Built **structured datasets** for training and evaluating **NLP models**.
- Transformed AI-generated outputs into **human-like, production-ready content** for downstream use.
- Collaborated with **cross-functional teams** to enhance AI-driven workflows and content generation pipelines.

SKILLS

React | Laravel | Drupal | PHP | JavaScript | REST APIs | Headless CMS | MySQL |
Tailwind CSS | Bootstrap | jQuery | Vite | Git | Docker | Jenkins | PHPUnit | Composer
| npm | MVC / SPA Architecture

EDUCATION

Course	Year	Institution	Score	Remarks
MCA	2024	SGT University	87%	Specialization in Computer Science Engineering
BCA	2022	Swami Vivekanand Subharti University	83%	Computer Science
12th Std.	2019	Universal Public School, Gurgaon (CBSE)	79%	PCM

CERTIFICATIONS, EXTRA CURRICULAR & AWARDS

- **Employee Excellence Award** — Recognized for delivering impactful solutions with innovation and efficiency.
- **Randstad AI Skills Accelerator** — Certified program on applied AI skills and modern development practices.
- Proficient in building scalable web applications, REST APIs, and headless CMS architectures in fast-paced product environments.
- Strong contributor to technical documentation and cross-functional collaboration across engineering and business teams.
